“ Web applications UI designer/developer brings experience planning and producing a variety of online offerings. Seeks a position that requires an aptitude for creative problem-solving and decision-making, and core competency in user-friendly interface design.

EXPERIENCE

Software Engineer, Cobalt August 2007 - present

- Led the front-end development effort for the Lexus team, creating low-level estimates and technical design documents for various projects. Provided feedback on client requirements related to performance and maintenance optimizations.
- Worked with other teams to drive core-level changes to a rigidly defined framework.

Web Developer, Prescott Newspapers, Inc. June 2006 - May 2007

- Re-developed the website for Yavapai Magazine. **Cut monthly update time in half.** Decreased loading time by 30% and used valid XHTML and CSS to make the website **more accessible to its varied audience.**
- Collaborated with the editorial staff to design and develop The Prescott Daily Courier’s “Web Exclusives” area. Created a PHP-driven back-end to facilitate the updating process.

Web Developer, Appointment Plus October 2003 - May 2006

- Identified, diagnosed, and fixed bugs within the code base of the existing software. **Prevented major problems within the system before paid subscribers were affected.**
- Designed websites for customers looking to enhance their online presence, **furthering company revenue** on a per-project basis.

Student Assistant, Collins College July 2002 - November 2004

- Worked with instructors to develop more effective lesson plans, and **instructed classrooms of up to 40 students** at a time in Adobe Photoshop and Illustrator.

HARD SKILLS

- Standards-compliant HTML & CSS.
- Cross-browser compatible JavaScript.
- jQuery and other frameworks.
- Adobe Flash CS3 & ActionScript 3.0.
- JSP/JSTL development.
- Adobe Photoshop.
- Adobe Illustrator.
- Windows, OSX & Ubuntu.

EDUCATION

- **B.A., Visual Communication**
Collins College, November 2004
